

A banana peel produces light for 40 minutes...

Easy to order

The use of an organic waste bin is voluntary in Bochum. The containers are available from a capacity of 60 litres. Collection and recycling is organised by the USB in cooperation with the Witten biogas plant.

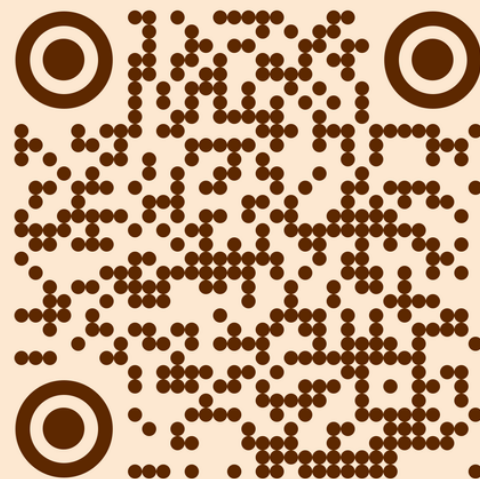

Reduce your residual waste fee

The fee for organic waste is lower than for residual waste and with an organic waste garbage can you can reduce your residual waste volume.

Generate sustainable electricity

Several households can be supplied with CO2-neutral electricity using the contents of organic waste bins.

Order your own organic » waste garbage can!*

* Are you a tenant?

Talk to your landlord about ordering the organic waste garbage can!

...if it is converted
into electricity in a
biogas plant.

What belongs in the organic waste garbage can?

- Food scraps, including cooked food
- vegetable kitchen waste
- coffee grounds/filters, tea/bags, egg shells
- kitchen paper
- garden waste

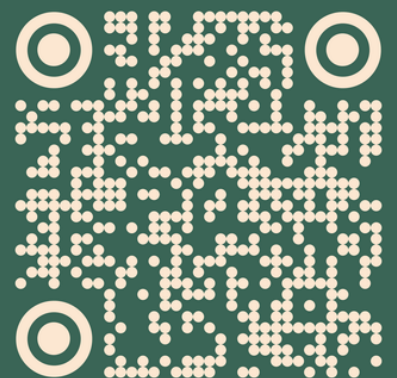

- oil and grease
- cat litter
- ash
- hygiene products
- non-decomposing materials (e.g. plastic, stones)
- treated or thick wood

What is BiBo?

Biotonnen für Bochum (BiBo) is a student project of Repairkultur Bochum and is aiming to get more households to use an organic waste garbage can.
